THE CTS BA+®

The CTS BA+® is an economical yet striking unit with the functionality of larger interactive products in a much smaller footprint. This unit's design allows space for custom branding and integration with multiple peripherals. For added security, the BA+ can be firmly bolted to a number of surfaces to ensure the kiosk remain secure. The 22-inch monitor allows for a better viewing surface and continues to provide your organization with a Windows based solution.

If space is limited, this is a kiosk you would want to consider. As with all CTS Kiosks, engineering is completed with an eye on the future.
