

## THE TABLE TOP+®

The CTS Table Top+ enclosure has the functionality of other interactive products in a compact footprint fit for a desktop. This unit's design allows space for custom branding and integration with multiple peripherals. For added security, the Table Top+ can be firmly bolted to a number of surfaces. The 22-inch monitor allows for a better viewing surface and continues to provide your organization with a Windows based solution.

The Table Top+ is ideal for locations with limited floorspace. As with all CTS Kiosks, engineering is completed with an eye on future technology.
